

## Phoenix Marine Solutions awarded the prestigious Supplier of the Year Award 2012 for Technical Innovation by Sunseeker International

At the Southampton Boat Show in September, Robert Braithwaite, Group President of Sunseeker International presented the Supplier of the Year for Technical Innovation 2012 to Phoenix Marine Solutions. The award was in recognition of the outstanding new hydraulic tender recovery/bathing platform system developed by Phoenix for the 40m Yacht, Predator 130 and the Predator 115. This product has been in service very successfully since September 2011. Phoenix have recently developed a similar system for the other end of the range and are working closely with Sunseeker International on a number of other unique products for their innovative new Yachts currently in development.

“We value our relationship with the truly iconic brand that Sunseeker International has become and look forward to continuing to provide them with market leading British Engineered solutions to complement their outstanding range of Yachts from 40-155 foot.”
