

Phoenix Marine Solutions Now an Approved Supplier to Sunseeker International

Sunseeker International has invited Phoenix Marine Solutions onto their exclusive “Approved Supplier” list. Phoenix have been designing, manufacturing and supplying hydraulics and specialist mechanical mechanisms to the marine industry for over a decade.

“This is a real boost to our business to have Sunseeker International recognise us as an important supplier to them. This shows great support from Sunseeker for UK based design and manufacturing to complement their exquisite UK manufactured Yachts. ” says Elizabeth Noles, Sales & Marketing Manager, Phoenix Marine Solutions.

"Andrew Macdonald Sunseeker International Ltd's Director of Procurement said 'Phoenix Marine Solutions have a good understanding of Sunseeker International's demanding requirements for quality and design. We are working together on a number of mechanical/hydraulic products for use on our yachts."

In spite of the downturn Phoenix Marine Solutions have increased their business in the marine sector. As a result Phoenix have recently improved their facility with the addition of more equipment allowing them to handle the larger mechanical mechanisms and have increased staff numbers to cope with the new business.

Phoenix will be exhibiting at METS Marine Equipment Trade Show at Stand 03.411 from 15th-17th November in Amsterdam. For more information please contact Elizabeth Noles on 01733 234800 or see www.phoenixmarinesolutions.co.uk
