

MARINE AND INDUSTRIAL TRANSMISSIONS WORKING WITH PHOENIX MARINE SOLUTIONS

Marine and Industrial Transmissions (MIT) have formed a working partnership with Phoenix Marine Solutions.

MIT work extensively throughout the leisure and commercial sectors of the marine industry, their work also extends to many industrial areas such as crushing equipment and locomotives. Sales & Marketing Director for MIT Martin Jackson commented, "With a common synergy in our customer bases Phoenix Marine Solutions were the obvious choice to help complete our service offering to clients." Already the alliance with Phoenix Marine Solutions means that MIT have been able to supply components they would have otherwise had to single source.

Phoenix Marine Solutions are a specialist provider of complete hydraulic solutions for superyachts. They design and manufacture a large range of centralised and auxiliary systems including, bathing platforms, tender winches, folding balconies, trim tabs, garage door hinges, stainless steel cylinders and any other bespoke mechanically engineered products that are hydraulically driven.

Elizabeth Noles, Sales & Marketing Manager for Phoenix Marine Solutions stated, "We chose to work closely with MIT as they are a highly professional and reputable company whose propulsion systems and expertise have a natural fit with our hydraulic systems and our knowledge. We are endeavouring to provide superyacht manufacturers with a one stop shop for propulsion and hydraulics resulting in a cost effective, centralised supply chain offering."

<ENDS>

Marine & Industrial Transmissions Ltd, (MIT) are prime suppliers of new units, spares and service of marine gears, power-shift transmissions, power take offs and associated products for drive line and propulsion systems. With plants in 2 UK locations they have provided expertise and quality products for over 35 years. Working with many well known suppliers such as Twin Disc, Nico, Transfluid and Rubber Design, MIT have provided and maintained equipment to power products manufactured by the likes of Sunseeker, Irish Rail, Terex, South Boats, and the M.O.D. They continue to expand their services and products offered to maintain their position as being one of the prime suppliers in the UK of drive line and propulsion solutions to all aspects of industry.
